Completed applications should be sent to

Cathy Richardson  
1041 Trail Road North  
Elizabethtown, PA 17022

**THE MATH FACTORY** is a learning center where kids go to improve their math skills. We are highly specialized; **we teach only math.**

Students attend as often as they like for up to 90 minutes depending on grade level and maturity.

Our math members can drop in anytime we are open. Our goal is to forge a solid foundation in math; one objective at a time. Students advance through math objectives only by mastery of base objectives; working at their own pace with our guided instruction.

Our students get excited about learning again because of the instant feedback and advancement to new material only when they are ready to handle it. **We get results!** All assignments are done the old fashioned way; with **paper and pencil.**
